This is a super handy sheet that you can refer to for the basics of setting up and creating your document.

RStudio R Markdown Tutorial

<https://rmarkdown.rstudio.com/lesson-1.html>

A comprehensive guide from RStudio and that goes over the basics of using RMarkdown.

R Markdown: The Definitive Guide

<https://bookdown.org/yihui/rmarkdown/>

The literal book on R Markdown, from the creators of R Markdown. Any persnickety questions you have about formatting or chunk parameters or whatever else you might come up with can be found here.

knitr in a knutshell

https://kbroman.org/knitr_knutshell/

A concise tutorial put together by Karl Broman that walks through some details of using the knitr package in R to compile your code and analyses into easy-to-share documents. This is also helpful if you want to branch out from the .Rmd file format to explore other options, such as writing in LaTeX in .Rnw files.

Markdown

<https://www.markdownguide.org/>

A basic guide to Markdown, which is what R Markdown is based off of.

LaTeX

<https://www.latex-project.org/>

If you ever venture into the world of .Rnw files and using LaTeX to write and compile your analysis documents (or any document really), this is the official place to start.
